Ramanathapuram

PROJECTS

GoldenCart (E-Commerce Store)

- Built a functional e-commerce platform with a functioning backend and frontend, and MySQL for database management.
- Implemented responsive design, ensuring a smooth and visually appealing user experience across devices.
- Integrated features such as product listing, shopping cart, and interactive navigation to enhance usability and customer engagement.

ControlHub (Admin Dashboard)

- Developed using React.js, providing a fast, responsive, and dynamic admin dashboard interface with reusable components.
- Built with Node.js and Express.js, connecting securely to a SQL database to handle all server-side operations and data storage.

Task Management Application

- A full-stack task management application that allows users to create, update, delete, and track tasks efficiently. It includes user authentication.
- Developed using React.js, providing a fast, responsive, and interface with reusable components.
